

Ubique Risk Management
Receives the Diamond
Distinction Award 2026 for
Security & Risk Consultancy
Firm of the Year.

Delivering World-Class Security and Risk Solutions Since 2011

Ubique Risk Management has established itself as a leading provider of bespoke security and safety risk management, project management, and specialist training services since its founding in 2011. With decades of collective operational experience, this UK-based team delivers tailored solutions to clients worldwide across industries including civil nuclear, military defence, national security, local authority, healthcare, construction, technology, private security, education, hospitality, and international aid organisations, to name a few.

Ubique provides expertise in Integrated Security Management, supporting innovative initiatives and programmes related to the former United Kingdom's Centre for the Protection of National Infrastructure (CPNI), now known as the National Protective Security Authority (NPSA). Ubique is uniquely positioned to provide Security Reviewer-approved specialists to deliver NPSA and National Cyber Security Centre (NCSC) Secure Innovation Security Reviews.

Ubique's Security Risk Management specialists are led by a Fellow of the Institute of Strategic Risk Management (ISRM), a professional who is appointed to the Institute of Strategic Risk Management (ISRM) Global Advisory Council, registered as a General Security Advisor on the NPSA-sponsored Register of Security Engineers and Specialists (RSES), a board member of the International Association of Healthcare Security and Safety (IAHSS) UK Chapter, and on the Advisory Council for TINYg - Global Counter Terrorism Information Network, among other specialist support roles.

Three Pillars of Excellence

Ubique's service portfolio centres on three core specialisms. Their Safety & Security Risk Management Consultancy provides customised risk assessments and strategies shaped around each client's operational requirements.

Their Project and Programme Management provision deploys certified professionals, including registered Association of Project Managers (APM) members, to deliver complex security, infrastructure, improvement, and compliance projects in line with strict regulatory standards.

The company's Training Academy offers professional qualification courses and training in security, risk management, first aid, health & safety, project management, and a wide range of other operational compliance disciplines, equipping professionals across multiple sectors with essential qualifications and practical expertise.

Tailored Solutions and Professional Standards

What distinguishes Ubique Risk Management is its client-centred approach. Rather than applying generic frameworks, the organisation designs bespoke strategies aligned with each project's objectives, operational environment, timescales, and budget. This adaptability is underpinned by respected professional credentials, including ISO 9001:2015 registration and Cyber Essentials accreditation, ensuring consistently high-quality service delivery and robust regulatory compliance.

Commitment to Sustainability and Ethics

Ubique demonstrates forward-thinking corporate responsibility through membership of the SME Climate Hub, pledging to halve emissions by 2030 as part of the United Nations Race to Zero campaign. This commitment to sustainability reflects the company's ethical, modern approach to business operations.

End-to-End Risk Management

From initial consultancy and training through to operational support and programme delivery, Ubique provides comprehensive services that reduce risk exposure while enhancing readiness and compliance across organisations of every scale. With proven expertise, sector versatility, and an unwavering commitment to quality, Ubique Risk Management exemplifies excellence in security and risk management consultancy.
